About Teako Minerals Corp.:

Teako Minerals Corp. is a Vancouver-based mineral exploration company committed to acquiring, exploring, and developing mineral properties in Norway, focusing on critical metals such as copper, cobalt, zinc and molybdenum. By leveraging leading-edge exploration technologies and strategic partnerships, Teako aims to address the growing demand for essential minerals while generating value for shareholders and stakeholders alike.

Teako’s Project Hub, including the Løkken and Venna main projects, covers an extensive land package prospective for copper, cobalt, zinc, gold, platinum group elements (or “PGE”), uranium, antimony, molybdenum and rare-earth-elements. The Project Hub strategy was initially developed from the Company’s first-mover advantage in-country, leveraging both technical skill and strong local community engagement to acquire and advance groups of both core and non-core assets. Core assets such as the Løkken-Venna district remain integral to the Company’s self-funded exploration programs, whereas the Company aims to retain exposure to exploration success on non-core assets through securing deals with strong partners. These deals, if secured, are intended to potentially bring in capital and/or ongoing cash flow, retain upside exposure, and

reduce overall risk, thereby strengthening Teako's foundation. Teako holds a 10% economic interest in the four (4) rare earth elements ("REE") projects owned by Fritzøe Skoger AS and a 10% non-dilutive free carried ownership interest in a package of copper, gold and silver projects consisting of 5 projects owned by Nordic Minerals AS, a wholly owned subsidiary of United Minerals Australia Pty Ltd as further described on the Company's website.
